## Care Tips

There are two types of turf: warm-season turf and cold-season turf. Warm-season turf grows fast when the weather is warm, while cold-season turf adapts to lower temperature. Nitrogen is the most common nutrient deficiency observed in turfgrass. In general, lawns should be fertilized about 4 times per year with 1 lb. of nitrogen at each application. It is always suggested to follow recommended fertilization rates for your turfgrass species.

### Growing with SaferGro®

#### New Seed/Sod Installation:

**PROMOT® MZM**- to improve seedling survival and promote healthy root growth.

Application: Mix 1.5 - 2.0 oz. per gallon of water for 1,000 sq.ft. of lawn. Repeat every 2-3 months or as needed.

#### Established Lawn:

**BIOMIN® IRON**- helps green up the lawn.

Application: Apply 3-4 Tsp. (1.5-2 oz.) per gallon of water for 1,000 sq. ft. of lawn and water in. Repeat every 4-6 weeks or as needed.

**ENDURANCE 20-3-3**- for correct nitrogen deficiency.

Application: Mix 2.5 - 3 oz. per gallon of water for 500 sq. ft. of lawn from early spring throughout the growing season. Apply every 10-14 days or as needed.

**HUMAX**- Increases water holding capability and nutrient uptake.

Application: Mix 1 tsp. per half gallon of water for 500 sq. ft. of lawn. Repeat every 4 - 6 weeks or as needed.

**NATURAL WET**- Helps reduce stress caused by draught and heat. Increases water uptake.

Application: Mix 2 tsp. per gallon of water for ????

## Care Tips

### Growing with SaferGro®

#### Established Lawn:

**NO MOSS-** kills liverwort and moss as spot treatment.

Application: Mix 4 oz. per gallon of water then spray through. Test in a small area 24 hours prior to application.

**PHOSGARD 0-28-25-** to promote root growth.

Application: Apply 4 tsp. per gallon of water for 1,000 sq. ft. of lawn.

For warm-season turf, repeat every 4 - 6 weeks year round.

For cold-season turf, repeat every 4-6 weeks throughout the season until temperatures drop or the first snow fall.
